

Congratulations your Healthy Early Years accreditation

Feedback:

- Columbia Market Nursery School provides an environment which strongly supports children's good health and well-being.
- Children are supported through the provision of healthy foods and drinks which meet the Healthy Early Years Guidelines.
- Columbia Market has a regular programme of parent sessions to help them appreciate the importance of healthy eating and oral health. These are practical sessions which involve cooking or visits from health professionals such as the community dental team.
- The outdoor space is well spacious and well resourced. Both girls and boys were observed making full use of opportunities for physical play. There is plentiful space and equipment which encourages safe risk taking.
- Children's allergies are managed very thoughtfully. Staff take training and offer support to their parents.
- Forest School sessions are delivered regularly in the local park. Parents are invited to participate and it has shown to be a positive experience for both the children and parents.

A ceremony will be held to celebrate your achievements and to collect your certificate. To book your place please e-mail:
